Thin Solid Films 308–309 (1997) 646–656

thin solid films

Subject Index of Volumes 308–309

ABS™
A Mössbauer spectroscopy study of Ti–Fe interfaces produced by the PVD process, 351
a-C:H:F
Surface analysis and bioreactions of F and Si containing a-C:H, 191
Adhesion
Nanotribology of ultrathin a:SiC/SiC-N overcoats using a depth sensing nanoindentation multiple sliding technique, 340
Auger depth profiles and stud pull adhesion of metal films on graphite–epoxy composites, 375
Adhesion testing
A comparative assessment of three approaches for ranking the adhesion of TiN coatings onto two steels, 329
Ag films
Titanium-nitride self-encapsulation of Cu and Ag films on silicon dioxide, 448
Alloys
A survey of ohmic contacts to III-V compound semiconductors, 599
Aluminum films
Some effects of temperature ramping on metal organic chemical vapor deposited Al film nucleation, 615
Aluminum nitride
Structural characterization of pulsed laser-deposited AlN thin films on semiconductor substrates, 406
Amorphous
Electronic properties and impurity levels in filtered cathodic vacuum arc (FCVA) amorphous silicon, 79
Amorphous carbon
Surface analysis and bioreactions of F and Si containing a-C:H, 191
Amorphous CN film
Optical and mechanical properties of amorphous CN films, 135
Amorphous silicon
Reaction of amorphous Si with cobalt silicide before disilicide formation for reducing Si consumption in SIMOX, 570
Annealing
Post-deposition processing of low temperature PECVD silicon dioxide films for enhanced stress stability, 68v
Atomic force microscopy
Surface interaction forces in chemical-mechanical planarization, 529
Auger electron spectroscopy
Vibrational spectroscopy of mixed hexagonal-cubic boron nitride thin films, 107
Auger depth profiles and stud pull adhesion of metal films on graphite–epoxy composites, 375
Microstructures of copper thin films prepared by chemical vapor deposition, 465

B^+ ion implants
Dose-rate effects on the formation of ultra-shallow junctions with low-energy B^+ and BF_2^+ ion implants, 562
Barrier
Electrical properties of Ti/TiN films prepared by chemical vapor deposition and their applications in submicron structures as contact and barrier materials, 589
Benzotriazole
Effects of corrosion environments on the surface finishing of copper chemical mechanical polishing, 518
BF_2^+ ion implants
Dose-rate effects on the formation of ultra-shallow junctions with low-energy B^+ and BF_2^+ ion implants, 562
Bias-enhanced nucleation
An improved method for large-area oriented nucleation of diamond during bias process via hot-filament chemical vapor deposition, 163
Biaxial bending
Investigation of the elastic modulus of thin films using simple biaxial bending techniques, 304
Bioreaction
Surface analysis and bioreactions of F and Si containing a-C:H, 191
Boron
Formation of cubic boron nitride by the reactive sputter deposition of boron, 94
Investigation of distribution of defects and impurities in boron-doped CVD diamond film by cathodoluminescence spectroscopy, 279
Boron nitride
Investigations on the structure of boron nitride films, 38
Low temperature plasma enhanced chemical vapour deposition boron nitride, 219
Boron nitride films
Formation of cubic boron nitride by the reactive sputter deposition of boron, 94
Buffer layers
Evaluation of buffer layers for hot filament chemical vapor deposition diamond films on silicon substrates, 209
Bulge test
Characterisation of TiN thin films using the bulge test and the nanoindentation technique, 334

Carbon nitride
Preparation of a novel target material for carbon nitride film deposition, 126

0257-8972/97/$17.00 © 1997 Elsevier Science S.A. All rights reserved
PII S0040-6090(97)00812-2

Carbon nitride films
Deposition of carbon nitride films by vacuum ion diode with explosive emission, 233
Carbon nitride sputtering
Low-energy ion bombardment effects in reactive rf magnetron sputtering of carbon nitride films, 118
Production and characterisation of carbon nitride thin films produced by a graphite hollow cathode system, 228
Carbon nitride thin films
Preparation of carbon nitride thin films by ion beam assisted deposition and their mechanical properties, 239
Cartesian coordinate maps
Cartesian coordinate maps for chemical mechanical planarization uniformity characterization, 512
Cathodic arc deposition
Heat treatment of cathodic arc deposited amorphous hard carbon films, 186
Metallization of CVD diamond films by cathodic arc deposition, 215
Cathodoluminescence
Investigation of distribution of defects and impurities in boron-doped CVD diamond film by cathodoluminescence spectroscopy, 279
CEMS
A Mössbauer spectroscopy study of Ti–Fe interfaces produced by the PVD process, 351
Cermet
Influence of surface integrity on performance of coated cutting tools, 345
Characterization
Spectroscopic characterization of processing-induced property changes in doped ZnO films, 56
TEM specimen preparation and characterization of ceramic coatings on fiber tows, 389
The small angle cleavage technique applied to coatings and thin films, 399
Chemical mechanical planarization
Cartesian coordinate maps for chemical mechanical planarization uniformity characterization, 512
CMP CoO reduction: slurry reprocessing, 538
Chemical mechanical polishing
Effects of corrosion environments on the surface finishing of copper chemical mechanical polishing, 518
Stress distribution in chemical mechanical polishing, 533
Chemical vapor deposition
Plasma enhanced chemical vapour deposition of silica thin films in an integrated distributed electron cyclotron resonance reactor, 63
High pressure high power microwave plasma chemical vapor deposition of large area diamond films, 141
Optical emission spectroscopy of the plasma during microwave CVD of diamond thin films with nitrogen addition and relation to the thin film morphology, 154
Production and characterisation of carbon nitride thin films produced by a graphite hollow cathode system, 228
Microstructures of copper thin films prepared by chemical vapor deposition, 465
Electrical properties of Ti/TiN films prepared by chemical vapor deposition and their applications in submicron structures as contact and barrier materials, 589
Chemical-mechanical planarization
Surface interaction forces in chemical-mechanical planarization, 529
Chemical-mechanical polishing
Effects of underlying films on the chemical-mechanical polishing for shallow trench isolation technology, 543
Chemical-mechanical polishing of low-dielectric-constant spin-on-glasses: film chemistries, slurry formulation and polish selectivity, 550
Chemical-mechanical polishing as an enabling technology for giant magnetoresistance devices, 555
Cleaved diamond fibers
Field emission from cleaved diamond fibers, 204
CN_x films
The composition and bonding structure of CN_x films and their influence on the mechanical properties, 130
Reactive magnetron sputtering of CN_x thin films at different substrate bias, 223
Optical characterization of nitrogenated carbon overcoats, 284
Coating adhesion
Influence of surface integrity on performance of coated cutting tools, 345
Coatings
Influence of surface integrity on performance of coated cutting tools, 345
TEM specimen preparation and characterization of ceramic coatings on fiber tows, 389
Thermal fatigue of hot work tool steel with hard coatings, 436
Cobalt silicide
Reaction of amorphous Si with cobalt silicide before disilicide formation for reducing Si consumption in SIMOX, 570
Edge leakage of cobalt silicided shallow junctions, 575
Color
The use of experimental design techniques to meet reflected color targets in pyrolytic low emissivity coatings, 26
Combustion flame method
About the growth of diamond crystals obtained by the combustion-flame method: use for coatings on large area substrates, 147
Improving thickness uniformity of freestanding diamond sheets synthesized by the combustion flame method, 245
Contact materials
A survey of ohmic contacts to III-V compound semiconductors, 599
Contact resistivity
Chemical-mechanical polishing as an enabling technology for giant magnetoresistance devices, 555
Copper
The dissolution of copper in common solvents used for low dielectric polymers, 486
Effects of corrosion environments on the surface finishing of copper chemical mechanical polishing, 518
Damascene copper interconnects with polymer ILDs, 523
Copper thin films
Microstructures of copper thin films prepared by chemical vapor deposition, 465
Corrosion
Effects of corrosion environments on the surface finishing of copper chemical mechanical polishing, 518

Corrosion-fatigue properties
Influence of electroless Ni-P deposits on the corrosion-fatigue properties of an AISI 1045 steel, 430
Cross-sectional TEM
The small angle cleavage technique applied to coatings and thin films, 399
Crystalline
Structural characterization of pulsed laser-deposited AlN thin films on semiconductor substrates, 406
Crystallite size
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Cu diffusion
Copper diffusion in organic polymer resists and inter-level dielectrics, 470
Cu films
Titanium-nitride self-encapsulation of Cu and Ag films on silicon dioxide, 448v
Cu lines
Electromigration in 0.25 μm wide Cu line on W, 443
Cubic boron nitride
Vibrational spectroscopy of mixed hexagonal-cubic boron nitride thin films, 107
Cubic boron nitride coatings
A novel approach to deposition of cubic boron nitride coatings, 101
CVD diamond films
Analysis of intrinsic stress distribution in grains of high quality CVD diamond film by micro-Raman spectroscopy, 168
Metallization of CVD diamond films by cathodic arc deposition, 215
Investigation of distribution of defects and impurities in boron-doped CVD diamond film by cathodoluminescence spectroscopy, 279

Damascene
Damascene copper interconnects with polymer ILDs, 523
Deposition rate
Morphology of dual beam ion sputtered films investigated by atomic force microscopy, 74
Depth profile
Elemental depth profiling of coated and surface-modified materials by GD-OES: hard coatings on cutting tools, 382
Diamond
Fabrication and characterization of spherical polycrystalline diamond emitter arrays, 85
Study for fabricating large area diamond single-crystal layers, 178
Diamond crystal
About the growth of diamond crystals obtained by the combustion-flame method: use for coatings on large area substrates, 147
Growth of flake-like diamond crystal using polymer precursor, 159
Diamond films
High pressure high power microwave plasma chemical vapor deposition of large area diamond films, 141
Evaluation of buffer layers for hot filament chemical vapor deposition diamond films on silicon substrates, 209
Measurement of internal stresses in CVD diamond films, 249
Application of heat treatment and dispersive strengthening concept in interlayer deposition to enhance diamond film adherence, 273
Diamond growth
Studies on CVD-diamond on Ti6Al4V alloy surface using hot filament assisted technique, 254
Diamond like carbon
Surface relaxation during plasma chemical vapor deposition of diamond-like carbon films, investigated by in-situ ellipsometry, 195
Structural dependence of mechanical properties of Si incorporated diamond-like carbon films deposited by RF plasma-assisted chemical vapour deposition, 263
Diamond-like nanocomposite films
Electrical properties of diamond-like nanocomposite coatings, 173
Diamond sheets
Improving thickness uniformity of freestanding diamond sheets synthesized by the combustion flame method, 245
Disilicide formation
Reaction of amorphous Si with cobalt silicide before disilicide formation for reducing Si consumption in SIMOX, 570
Disk coatings
Optical characterization of nitrogenated carbon overcoats, 284
Disordered Ni_3Fe
Modification of a disordered Ni_3Fe alloy surface by 50 keV Zr ion implantation, 393
Dispersive strengthening
Application of heat treatment and dispersive strengthening concept in interlayer deposition to enhance diamond film adherence, 273
Dissolution
The dissolution of copper in common solvents used for low dielectric polymers, 486
Doped ZnO films
Spectroscopic characterization of processing-induced property changes in doped ZnO films, 56
Dual ion-beam sputtering
Morphology of dual beam ion sputtered films investigated by atomic force microscopy, 74

Edge emission
Investigation of distribution of defects and impurities in boron-doped CVD diamond film by cathodoluminescence spectroscopy, 279
Edge leakage
Edge leakage of cobalt silicided shallow junctions, 575
Effective medium approximation
Analysis of binary electrochromic tungsten oxides with effective medium theory, 50
Elastic modulus
Investigation of the elastic modulus of thin films using simple biaxial bending techniques, 304
Elastic recoil detection
Investigations on the structure of boron nitride films, 38
Electrical properties
Electrical properties of diamond-like nanocomposite coatings, 173
Electrical resistance
Characterization of Al-1 wt% Y thin films for VLSI interconnects, 460

Electrochromic vanadium tungsten oxide
Analysis of binary electrochromic tungsten oxides with effective medium theory, 50
Electroless nickel deposits
Influence of electroless Ni-P deposits on the corrosion-fatigue properties of an AISI 1045 steel, 430
Electromigration
Electromigration in 0.25 μm wide Cu line on W, 443
Electron beam
PML/oxide/PML barrier layer performance differences arising from use of UV or electron beam polymerization of the PML layers, 19
Electronic properties
Electrical and mechanical properties of MgO thin films on GaAs, 611
Ellipsometry
Sensitivity of variable angle spectroscopic ellipsometry to isotropic thin film properties, 31
Investigations on the structure of boron nitride films, 38
Ellipsometric studies of thermally induced transformation phenomena in oxide films, 42
Emission
Elemental depth profiling of coated and surface-modified materials by GD-OES: hard coatings on cutting tools, 382
Emission current
Fabrication and characterization of spherical polycrystalline diamond emitter arrays, 85
Encapsulation
Titanium-nitride self-encapsulation of Cu and Ag films on silicon dioxide, 448
Experimental design
The use of experimental design techniques to meet reflected color targets in pyrolytic low emissivity coatings, 26
Explosive emission
Deposition of carbon nitride films by vacuum ion diode with explosive emission, 233

Fatigue behavior
Determination of the fatigue properties of multilayer PVD coatings on various substrates, based on the impact test and its FEM simulation, 315
Fibers
TEM specimen preparation and characterization of ceramic coatings on fiber tows, 389
Field emission
Field emission from cleaved diamond fibers, 204
Field emitter array
Fabrication and characterization of spherical polycrystalline diamond emitter arrays, 85
Film deposition parameters
Spectroscopic characterization of processing-induced property changes in doped ZnO films, 56
Film hardness
Preparation of carbon nitride thin films by ion beam assisted deposition and their mechanical properties, 239
Film thickness
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Filtered cathodic vacuum arc
Growth conditions and properties of tetrahedral amorphous carbon films, 199
Flakes
Growth of flake-like diamond crystal using polymer precursor, 159
Fluorine dope oxide
Stabilizing dielectric constant of fluorine-doped SiO_2 film by N_2O and NH_3 plasma post-treatment, 501
Fluorine doped silicon dioxide films
Deposition of stable, low κ and high deposition rate SiF_4-doped TEOS fluorinated silicon dioxide (SiOF) films, 507
Focused ion beam
Applications of focused ion beam machining to the characterization of carbide, nitride and oxide films, 369
Fourier transform infrared spectroscopy
Low temperature plasma enhanced chemical vapour deposition boron nitride, 219
Friction
Bending stiffness measurements of magnetic tapes and substrates, 323
Friction coefficient
Preparation of carbon nitride thin films by ion beam assisted deposition and their mechanical properties, 239

GaAs
Electrical and mechanical properties of MgO thin films on GaAs, 611
GaAs etching
The characterization of etched GaAs surface with HCl or H_3PO_4 solutions, 634
Giant magnetoresistance
Chemical-mechanical polishing as an enabling technology for giant magnetoresistance devices, 555
Glow discharge
Elemental depth profiling of coated and surface-modified materials by GD-OES: hard coatings on cutting tools, 382
Glow discharge optical spectroscopy
Glow discharge optical spectroscopy depth profiles of ion implanted steel, titanium and titanium nitride coatings, 425
Grain orientation
Electrical, optical and structural characteristics of indium-tin-oxide thin films deposited on glass and polymer substrates, 1
Graphite–epoxy
Auger depth profiles and stud pull adhesion of metal films on graphite–epoxy composites, 375
Growth conditions
Growth conditions and properties of tetrahedral amorphous carbon films, 199

Hard carbon films
Heat treatment of cathodic arc deposited amorphous hard carbon films, 186
Hardness
Superhard coatings of CN_x/ZrN multilayers prepared by DC magnetron sputtering, 113
Structural characterization of pulsed laser-deposited AlN thin films on semiconductor substrates, 406
HCl/H_3PO_4
The characterization of etched GaAs surface with HCl or H_3PO_4 solutions, 634

Heat treatment
Application of heat treatment and dispersive strengthening concept in interlayer deposition to enhance diamond film adherence, 273
Hexagonal BN
Low temperature plasma enhanced chemical vapour deposition boron nitride, 219
High power
High pressure high power microwave plasma chemical vapor deposition of large area diamond films, 141
High pressure
High pressure high power microwave plasma chemical vapor deposition of large area diamond films, 141
High temperature BPSG annealing
The effects of screen oxide and low temperature BPSG anneal on titanium salicide formation, 585
Hollow cathode
An improved method for large-area oriented nucleation of diamond during bias process via hot-filament chemical vapor deposition, 163
Homoepitaxy
Study for fabricating large area diamond single-crystal layers, 178
Hot filament assisted technique
Studies on CVD-diamond on Ti6Al4V alloy surface using hot filament assisted technique, 254
Hot filament chemical vapor deposition
Measurement of internal stresses in CVD diamond films, 249
Hot work tool steel
Thermal fatigue of hot work tool steel with hard coatings, 436
Hydrogen
A novel approach to deposition of cubic boron nitride coatings, 101

Impurities
Post-deposition processing of low temperature PECVD silicon dioxide films for enhanced stress stability, 68
Electronic properties and impurity levels in filtered cathodic vacuum arc (FCVA) amorphous silicon, 79
Indentation
A comparative assessment of three approaches for ranking the adhesion of TiN coatings onto two steels, 329
Infrared spectroscopy
Vibrational spectroscopy of mixed hexagonal-cubic boron nitride thin films, 107
Inhomogeneities
Structural inhomogeneities in thin epitaxial films of $YBa_2Cu_3O_{7-\delta}$ and their effects on superconducting properties, 420
In-situ ellipsometry
Surface relaxation during plasma chemical vapor deposition of diamond-like carbon films, investigated by in-situ ellipsometry, 195
Integrated circuits
Characterization of Al-1 wt% Y thin films for VLSI interconnects, 460
Integrated distributed electron cyclotron resonance reactor
Plasma enhanced chemical vapour deposition of silica thin films in an integrated distributed electron cyclotron resonance reactor, 63
Interconnect material
Characterization of Al-1 wt% Y thin films for VLSI interconnects, 460
Damascene copper interconnects with polymer ILDs, 523
Interlayer
Application of heat treatment and dispersive strengthening concept in interlayer deposition to enhance diamond film adherence, 273
Inter-metal dielectric structures
Improved ozone-tetraethoxysilane oxide reliability for deep submicron inter-metal dielectric applications by deposition of a silane-based oxide underlayer, 621
Intermetal dielectric
Deposition of stable, low κ and high deposition rate SiF_4-doped TEOS fluorinated silicon dioxide (SiOF) films, 507
Intermetal dielectrics
Application of SiO_2 aerogel film with low dielectric constant to intermetal dielectrics, 490
Internal stresses
Measurement of internal stresses in CVD diamond films, 249
Ion assisted beam deposition
Preparation of carbon nitride thin films by ion beam assisted deposition and their mechanical properties, 239
Ion beam analysis
Materials characterization of $Si_{1-x-y}Ge_xC_y/Si$ superlattice structures, 358
Ion bombardment
Low-energy ion bombardment effects in reactive rf magnetron sputtering of carbon nitride films, 118
Ion energy
Optical properties of tetrahedral amorphous carbon films determined by spectroscopic ellipsometry, 268
Ion etching
A Mössbauer spectroscopy study of Ti–Fe interfaces produced by the PVD process, 351
Ion implantation
Modification of a disordered Ni_3Fe alloy surface by 50 keV Zr ion implantation, 393
A study of ion-bombarded nanostructures on germanium surfaces by scanning probe microscopy, 415
Glow discharge optical spectroscopy depth profiles of ion implanted steel, titanium and titanium nitride coatings, 425
Ion milling
Applications of focused ion beam machining to the characterization of carbide, nitride and oxide films, 369
Ion-thin-film interaction
Surface relaxation during plasma chemical vapor deposition of diamond-like carbon films, investigated by in-situ ellipsometry, 195
ITO
Electrical, optical and structural characteristics of indium-tin-oxide thin films deposited on glass and polymer substrates, 1

Key parameters
About the growth of diamond crystals obtained by the combustion-flame method: use for coatings on large area substrates, 147
Large surface
Study for fabricating large area diamond single-crystal layers, 178

Layer growth
Growth of flake-like diamond crystal using polymer precursor, 159
Low dielectric constant
Application of SiO_2 aerogel film with low dielectric constant to intermetal dielectrics, 490
Low dielectric constant
Fundamental insight on developing low dielectric constant polyimides, 480
Low dielectric constant
Heat resistant polyimide films with low dielectric constant by vapor deposition polymerization, 475
Low dielectric constant
Preparation and characterization of porous silica xerogel film for low dielectric application, 495
Low dielectric
Stabilizing dielectric constant of fluorine-doped SiO_2 film by N_2O and NH_3 plasma post-treatment, 501
Low emissivity
The use of experimental design techniques to meet reflected color targets in pyrolytic low emissivity coatings, 26
Low-pressure-chemical-vapour-deposition
Characterization of TiN film grown by low-pressure-chemical-vapor-deposition, 594

Magnetic tape
Bending stiffness measurements of magnetic tapes and substrates, 323
Magnetron sputtering
Preparation of transparent conducting $In_4Sn_3O_{12}$ thin films by DC magnetron sputtering, 13
Superhard coatings of CN_x/ZrN multilayers prepared by DC magnetron sputtering, 113
Low-energy ion bombardment effects in reactive rf magnetron sputtering of carbon nitride films, 118
Reactive magnetron sputtering of CN_x thin films at different substrate bias, 223
Investigation of the elastic modulus of thin films using simple biaxial bending techniques, 304
Mechanical properties
The composition and bonding structure of CN_x films and their influence on the mechanical properties, 130
Preparation of carbon nitride thin films by ion beam assisted deposition and their mechanical properties, 239
Between nanoindentation and scanning force microscopy: measuring mechanical properties in the nanometer regime, 289
Metal oxides
Preparation of transparent conducting $In_4Sn_3O_{12}$ thin films by DC magnetron sputtering, 13
Metallization
Metallization of CVD diamond films by cathodic arc deposition, 215
Auger depth profiles and stud pull adhesion of metal films on graphite–epoxy composites, 375
Metallization of sub-micron trenches and vias with high aspect ratio, 455
Damascene copper interconnects with polymer ILDs, 523
Method improvement
Improving thickness uniformity of freestanding diamond sheets synthesized by the combustion flame method, 245
1-Methyl-2-pyrrolidinone
Copper diffusion in organic polymer resists and inter-level dielectrics, 470
MgO films
Electrical and mechanical properties of MgO thin films on GaAs, 611
Microelectronic devices
Fundamental insight on developing low dielectric constant polyimides, 480
Micromachining
Optical scattering enhanced by silicon micromachined surfaces, 8
Micro-Raman spectroscopy
Analysis of intrinsic stress distribution in grains of high quality CVD diamond film by micro-Raman spectroscopy, 168
Microstrains
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Microstructure
Electromigration in 0.25 μm wide Cu line on W, 443
Microwave plasma chemical vapor deposition
Fabrication and characterization of spherical polycrystalline diamond emitter arrays, 85
High pressure high power microwave plasma chemical vapor deposition of large area diamond films, 141
Modulus of elasticity
Bending stiffness measurements of magnetic tapes and substrates, 323
Molecular beam epitaxy
Materials characterization of $Si_{1-x-y}Ge_xC_y$/Si superlattice structures, 358
Mosaic
Study for fabricating large area diamond single-crystal layers, 178
Multilayer coatings
Determination of the fatigue properties of multilayer PVD coatings on various substrates, based on the impact test and its FEM simulation, 315
Multilayer films
Applications of focused ion beam machining to the characterization of carbide, nitride and oxide films, 369
Multilevel interconnection
Heat resistant polyimide films with low dielectric constant by vapor deposition polymerization, 475
Multiphase materials
Novel nanoindentation method for characterising multiphase materials, 297

Nano-hardness tester
Novel nanoindentation method for characterising multiphase materials, 297
Nanoindentation
Superhard coatings of CN_x/ZrN multilayers prepared by DC magnetron sputtering, 113
Heat treatment of cathodic arc deposited amorphous hard carbon films, 186
Between nanoindentation and scanning force microscopy: measuring mechanical properties in the nanometer regime, 289
Characterisation of TiN thin films using the bulge test and the nanoindentation technique, 334

Nanotribology of ultrathin a:SiC/SiC-N overcoats using a depth sensing nanoindentation multiple sliding technique, 340
Nanostructure
A study of ion-bombarded nanostructures on germanium surfaces by scanning probe microscopy, 415
Nanotribology
Nanotribology of ultrathin a:SiC/SiC-N overcoats using a depth sensing nanoindentation multiple sliding technique, 340
n-GaA
Thermal stability of the non-alloyed Pd/Sn and Pd/Ge Ohmic contacts to *n*-GaAs, 607
Nitridation
A comparative study of refractory metal nitridation in an NH_3 ambient, 410
Nitrogenated carbon overcoats
Optical characterization of nitrogenated carbon overcoats, 284
Non-alloyed Pd/Ge Ohmic contacts
Thermal stability of the non-alloyed Pd/Sn and Pd/Ge Ohmic contacts to *n*-GaAs, 607
Nucleation density
Some effects of temperature ramping on metal organic chemical vapor deposited Al film nucleation, 615

Optical constants
Analysis of binary electrochromic tungsten oxides with effective medium theory, 50
Optical emission spectroscopy
Optical emission spectroscopy of the plasma during microwave CVD of diamond thin films with nitrogen addition and relation to the thin film morphology, 154
Optical measurement
Sensitivity of variable angle spectroscopic ellipsometry to isotropic thin film properties, 31
Optical properties
Sensitivity of variable angle spectroscopic ellipsometry to isotropic thin film properties, 31
Optical and mechanical properties of amorphous CN films, 135
Optical properties of tetrahedral amorphous carbon films determined by spectroscopic ellipsometry, 268
Fundamental insight on developing low dielectric constant polyimides, 480
Optical scattering
Optical scattering enhanced by silicon micromachined surfaces, 8
Oriented diamond
An improved method for large-area oriented nucleation of diamond during bias process via hot-filament chemical vapor deposition, 163
Oxide
Surface interaction forces in chemical-mechanical planarization, 529
CMP CoO reduction: slurry reprocessing, 538
Ozone-tetraethoxysilane oxides
Improved ozone-tetraethoxysilane oxide reliability for deep submicron inter-metal dielectric applications by deposition of a silane-based oxide underlayer, 621
PACVD
Influence of surface integrity on performance of coated cutting tools, 345
Passivation
A comparative study of refractory metal nitridation in an NH_3 ambient, 410
Phase transformation
Ellipsometric studies of thermally induced transformation phenomena in oxide films, 42
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Photoresist characteristics
Photoresist characteristics of polyurea films prepared by vapor deposition polymerization, 90
Plain carbon steel
Influence of electroless Ni-P deposits on the corrosion-fatigue properties of an AISI 1045 steel, 430
Plasma assisted chemical vapour deposition
Post-deposition processing of low temperature PECVD silicon dioxide films for enhanced stress stability, 68
A novel approach to deposition of cubic boron nitride coatings, 101
Low temperature plasma enhanced chemical vapour deposition boron nitride, 219
Improved ozone-tetraethoxysilane oxide reliability for deep submicron inter-metal dielectric applications by deposition of a silane-based oxide underlayer, 621
Plasma film deposition
Surface relaxation during plasma chemical vapor deposition of diamond-like carbon films, investigated by in-situ ellipsometry, 195
Plasma post-treatment
Stabilizing dielectric constant of fluorine-doped SiO_2 film by N_2O and NH_3 plasma post-treatment, 501
Plasma power
Production and characterisation of carbon nitride thin films produced by a graphite hollow cathode system, 228
Plasma sheath
An improved method for large-area oriented nucleation of diamond during bias process via hot-filament chemical vapor deposition, 163
Polar maps
Cartesian coordinate maps for chemical mechanical planarization uniformity characterization, 512
Polarized IR reflection spectroscopy
Investigations on the structure of boron nitride films, 38
Polyimide
Copper diffusion in organic polymer resists and inter-level dielectrics, 470
Heat resistant polyimide films with low dielectric constant by vapor deposition polymerization, 475
Fundamental insight on developing low dielectric constant polyimides, 480
Polymer film
Copper diffusion in organic polymer resists and inter-level dielectrics, 470
Polymer ILD
Damascene copper interconnects with polymer ILDs, 523

Polymer oxide polymer barrier
PML/oxide/PML barrier layer performance differences arising from use of UV or electron beam polymerization of the PML layers, 19
Polymer precursor
Growth of flake-like diamond crystal using polymer precursor, 159
Polymers
PML/oxide/PML barrier layer performance differences arising from use of UV or electron beam polymerization of the PML layers, 19
The dissolution of copper in common solvents used for low dielectric polymers, 486
Polyurea films
Photoresist characteristics of polyurea films prepared by vapor deposition polymerization, 90
Porosity
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Porosity characteristics
Preparation and characterization of porous silica xerogel film for low dielectric application, 495
Porous diamond membranes
Study of porosity in permeable diamond membranes, 258
Post-deposition processing
Post-deposition processing of low temperature PECVD silicon dioxide films for enhanced stress stability, 68
Power spectral density
Field emission from cleaved diamond fibers, 204
Processing-induced changes
Spectroscopic characterization of processing-induced property changes in doped ZnO films, 56
Properties
PML/oxide/PML barrier layer performance differences arising from use of UV or electron beam polymerization of the PML layers, 19
Plasma enhanced chemical vapour deposition of silica thin films in an integrated distributed electron cyclotron resonance reactor, 63
A survey of ohmic contacts to III-V compound semiconductors, 599
Pulsed high vacuum arc evaporator
Metallization of sub-micron trenches and vias with high aspect ratio, 455
Pulsed laser deposition
Structural characterization of pulsed laser-deposited AlN thin films on semiconductor substrates, 406

Raman spectroscopy
Ellipsometric studies of thermally induced transformation phenomena in oxide films, 42
Vibrational spectroscopy of mixed hexagonal-cubic boron nitride thin films, 107
Heat treatment of cathodic arc deposited amorphous hard carbon films, 186
Measurement of internal stresses in CVD diamond films, 249
Reactive DC sputtering
The composition and bonding structure of CN_x films and their influence on the mechanical properties, 130
Reactive ion assisted deposition
Vibrational spectroscopy of mixed hexagonal-cubic boron nitride thin films, 107
Refractory metal
A comparative study of refractory metal nitridation in an NH_3 ambient, 410
Reprocessing
CMP CoO reduction: slurry reprocessing, 538
Residual stress
Application of heat treatment and dispersive strengthening concept in interlayer deposition to enhance diamond film adherence, 273
A practical method for the determination of the Young's modulus and residual stresses of PVD thin films, 310
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Rf magnetron sputtering
Formation of cubic boron nitride by the reactive sputter deposition of boron, 94

Salicide thin films and lines
Synchrotron radiation characterization of metal silicide thin films: some observations, 580
Scanning electron microscope
Study of porosity in permeable diamond membranes, 258
Scanning force microscopy
Between nanoindentation and scanning force microscopy: measuring mechanical properties in the nanometer regime, 289
Novel nanoindentation method for characterising multiphase materials, 297
Scanning probe microscopy
A study of ion-bombarded nanostructures on germanium surfaces by scanning probe microscopy, 415
Schottky barrier
Correlation of morphology and electrical properties of nanoscale $TiSi_2$ epitaxial islands on Si (001), 627
Screen oxide
The effects of screen oxide and low temperature BPSG anneal on titanium salicide formation, 585
Semiconductors
A survey of ohmic contacts to III-V compound semiconductors, 599
Shallow junctions
Edge leakage of cobalt silicided shallow junctions, 575
Shallow trench isolation technology
Effects of underlying films on the chemical-mechanical polishing for shallow trench isolation technology, 543
Sheet resistance
Electrical, optical and structural characteristics of indium-tin-oxide thin films deposited on glass and polymer substrates, 1
Si (001) substrates
Correlation of morphology and electrical properties of nanoscale $TiSi_2$ epitaxial islands on Si (001), 627
Si incorporated films
Structural dependence of mechanical properties of Si incorporated diamond-like carbon films deposited by RF plasma-assisted chemical vapour deposition, 263
Si $L_{3,2}$-edge
Synchrotron radiation characterization of metal silicide thin films: some observations, 580

Si-a-C:H
Surface analysis and bioreactions of F and Si containing a-C:H, 191
Silica xerogel film
Preparation and characterization of porous silica xerogel film for low dielectric application, 495
Silicon
Optical scattering enhanced by silicon micromachined surfaces, 8
Electronic properties and impurity levels in filtered cathodic vacuum arc (FCVA) amorphous silicon, 79
Silicon dioxide
Titanium-nitride self-encapsulation of Cu and Ag films on silicon dioxide, 448
Silicon germanium carbon
Materials characterization of $Si_{1-x-y}Ge_xC_y/Si$ superlattice structures, 358
Silicon nitride
Chemical-mechanical polishing as an enabling technology for giant magnetoresistance devices, 555
Silicon substrates
Evaluation of buffer layers for hot filament chemical vapor deposition diamond films on silicon substrates, 209
Silicone surface
Study of porosity in permeable diamond membranes, 258
Silver
A comparative study of refractory metal nitridation in an NH_3 ambient, 410
SiO_2 aerogel
Application of SiO_2 aerogel film with low dielectric constant to intermetal dielectrics, 490
Size distribution
Correlation of morphology and electrical properties of nanoscale $TiSi_2$ epitaxial islands on Si (001), 627
Slurry
CMP CoO reduction: slurry reprocessing, 538
Chemical-mechanical polishing of low-dielectric-constant spin-on-glasses: film chemistries, slurry formulation and polish selectivity, 550
Small angle cleavage technique
The small angle cleavage technique applied to coatings and thin films, 399
Smith diagrams
Determination of the fatigue properties of multilayer PVD coatings on various substrates, based on the impact test and its FEM simulation, 315
Sol-gel method
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
Solvents
The dissolution of copper in common solvents used for low dielectric polymers, 486
sp^2 cluster
Optical and mechanical properties of amorphous CN films, 135
Spectrometry
Elemental depth profiling of coated and surface-modified materials by GD-OES: hard coatings on cutting tools, 382
Spectroscopic ellipsometry
Optical properties of tetrahedral amorphous carbon films determined by spectroscopic ellipsometry, 268
Spectroscopy
Spectroscopic characterization of processing-induced property changes in doped ZnO films, 56
Spin-on-glass
Chemical-mechanical polishing of low-dielectric-constant spin-on-glasses: film chemistries, slurry formulation and polish selectivity, 550
Stability
Post-deposition processing of low temperature PECVD silicon dioxide films for enhanced stress stability, 68
Stable films
Deposition of stable, low κ and high deposition rate SiF_4-doped TEOS fluorinated silicon dioxide (SiOF) films, 507
Steel
Glow discharge optical spectroscopy depth profiles of ion implanted steel, titanium and titanium nitride coatings, 425
Stress distribution
Analysis of intrinsic stress distribution in grains of high quality CVD diamond film by micro-Raman spectroscopy, 168
Sub-micrometer structures
Metallization of sub-micron trenches and vias with high aspect ratio, 455
Substrate bias
Production and characterisation of carbon nitride thin films produced by a graphite hollow cathode system, 228
Superconductivity
Structural inhomogeneities in thin epitaxial films of $YBa_2Cu_3O_{7-\delta}$ and their effects on superconducting properties, 420
Superlattice
Materials characterization of $Si_{1-x-y}Ge_xC_y/Si$ superlattice structures, 358
Surface morphology
Morphology of dual beam ion sputtered films investigated by atomic force microscopy, 74
Surface potential
Surface interaction forces in chemical-mechanical planarization, 529
Surface properties
The characterization of etched GaAs surface with HCl or H_3PO_4 solutions, 634
Surface roughness
Morphology of dual beam ion sputtered films investigated by atomic force microscopy, 74
Synchrotron radiation
Synchrotron radiation characterization of metal silicide thin films: some observations, 580

Tape stiffness
Bending stiffness measurements of magnetic tapes and substrates, 323
Temperature ramping
Some effects of temperature ramping on metal organic chemical vapor deposited Al film nucleation, 615
Tetrahedral amorphous carbon films
Optical properties of tetrahedral amorphous carbon films determined by spectroscopic ellipsometry, 268
Tetrahedral amorphous carbon
Growth conditions and properties of tetrahedral amorphous carbon films, 199

Thermal fatigue
Thermal fatigue of hot work tool steel with hard coatings, 436
Thermal stability
Thermal stability of the non-alloyed Pd/Sn and Pd/Ge Ohmic contacts to *n*-GaAs, 607
Thin film
The use of experimental design techniques to meet reflected color targets in pyrolytic low emissivity coatings, 26
Sensitivity of variable angle spectroscopic ellipsometry to isotropic thin film properties, 31
Plasma enhanced chemical vapour deposition of silica thin films in an integrated distributed electron cyclotron resonance reactor, 63
Optical emission spectroscopy of the plasma during microwave CVD of diamond thin films with nitrogen addition and relation to the thin film morphology, 154
Investigation of the elastic modulus of thin films using simple biaxial bending techniques, 304
A comparative assessment of three approaches for ranking the adhesion of TiN coatings onto two steels, 329
Thin hard physical vapour deposited coatings
A practical method for the determination of the Young's modulus and residual stresses of PVD thin films, 310
Ti nitridation
Titanium-nitride self-encapsulation of Cu and Ag films on silicon dioxide, 448
Ti6Al4V substrate
Studies on CVD-diamond on Ti6Al4V alloy surface using hot filament assisted technique, 254
Time to failure
Characterization of Al-1 wt% Y thin films for VLSI interconnects, 460
TiN
A comparative assessment of three approaches for ranking the adhesion of TiN coatings onto two steels, 329
TiN film
Characterization of TiN film grown by low-pressure-chemical-vapor-deposition, 594
TiN thin films
Characterisation of TiN thin films using the bulge test and the nanoindentation technique, 334
TiS_2 epitaxial islands
Correlation of morphology and electrical properties of nanoscale $TiSi_2$ epitaxial islands on Si (001), 627
Titanium nitride
Glow discharge optical spectroscopy depth profiles of ion implanted steel, titanium and titanium nitride coatings, 425
Electrical properties of Ti/TiN films prepared by chemical vapor deposition and their applications in submicron structures as contact and barrier materials, 589
Titanium
Glow discharge optical spectroscopy depth profiles of ion implanted steel, titanium and titanium nitride coatings, 425
Electrical properties of Ti/TiN films prepared by chemical vapor deposition and their applications in submicron structures as contact and barrier materials, 589
Titanium salicide
The effects of screen oxide and low temperature BPSG anneal on titanium salicide formation, 585
Transmission electron microscopy
TEM specimen preparation and characterization of ceramic coatings on fiber tows, 389
The small angle cleavage technique applied to coatings and thin films, 399
Microstructures of copper thin films prepared by chemical vapor deposition, 465
Transmittance
Electrical, optical and structural characteristics of indium-tin-oxide thin films deposited on glass and polymer substrates, 1
Transparent conducting oxide
Preparation of transparent conducting $In_4Sn_3O_{12}$ thin films by DC magnetron sputtering, 13
Transparent electrode
Preparation of transparent conducting $In_4Sn_3O_{12}$ thin films by DC magnetron sputtering, 13
Trenches
Metallization of sub-micron trenches and vias with high aspect ratio, 455

Ultra-shallow junctions
Dose-rate effects on the formation of ultra-shallow junctions with low-energy B^+ and BF_2^+ ion implants, 562
Ultrathin overcoats
Nanotribology of ultrathin a:SiC/SiC-N overcoats using a depth sensing nanoindentation multiple sliding technique, 340
Ultraviolet light
PML/oxide/PML barrier layer performance differences arising from use of UV or electron beam polymerization of the PML layers, 19
UV photo-assisted synthesis
Preparation of a novel target material for carbon nitride film deposition, 126

Vacancy
Investigation of distribution of defects and impurities in boron-doped CVD diamond film by cathodoluminescence spectroscopy, 279
Vacuum arc
Electronic properties and impurity levels in filtered cathodic vacuum arc (FCVA) amorphous silicon, 79
Vacuum ion deposition
Deposition of carbon nitride films by vacuum ion diode with explosive emission, 233
Vapor deposition polymerization
Photoresist characteristics of polyurea films prepared by vapor deposition polymerization, 90
Heat resistant polyimide films with low dielectric constant by vapor deposition polymerization, 475
Vias
Metallization of sub-micron trenches and vias with high aspect ratio, 455
Von Mises stress
Stress distribution in chemical mechanical polishing, 533
Wafer scale model
Stress distribution in chemical mechanical polishing, 533
Wear
Bending stiffness measurements of magnetic tapes and substrates, 323

Wear resistant
Electrical properties of diamond-like nanocomposite coatings, 173

XPS
Surface analysis and bioreactions of F and Si containing a-C:H, 191
X-ray absorption fine structures
Synchrotron radiation characterization of metal silicide thin films: some observations, 580
X-ray diffraction
Superhard coatings of CN_x/ZrN multilayers prepared by DC magnetron sputtering, 113

Young's modulus
A practical method for the determination of the Young's modulus and residual stresses of PVD thin films, 310

Zinc oxide
Ellipsometric studies of thermally induced transformation phenomena in oxide films, 42
Zirconia oxide
Chemical-mechanical polishing of low-dielectric-constant spin-on-glasses: film chemistries, slurry formulation and polish selectivity, 550
Zr ion
Modification of a disordered Ni_3Fe alloy surface by 50 keV Zr ion implantation, 393
ZrO_2 films
Crystallization and residual stress formation of sol-gel-derived zirconia films, 363
